*Malcolm Wells is renowned as an architect of underground buildings (**Underground Designs, NWEC** p. 240), but he's also acquiring a reputation as the conscience of his profession. If this article intrigues you, take a look at his newest book **Gentle Architecture** (1981; $22.50 postpaid from McGraw-Hill Book Company, Princeton Road, Hightstown, NJ 08520). As for his illustrations here, he asked for us to say, "The buildings shown in the drawings are of honest-to-god existing structures with just a few details changed to prevent the unproductive hassling of their owners."* —SB
